

The New Alkal-Life 7000sL

Next Generation Technology

World's Most Advanced Technology in Water Ionization & Purification

Introducing the world's first and best pH calibration system.

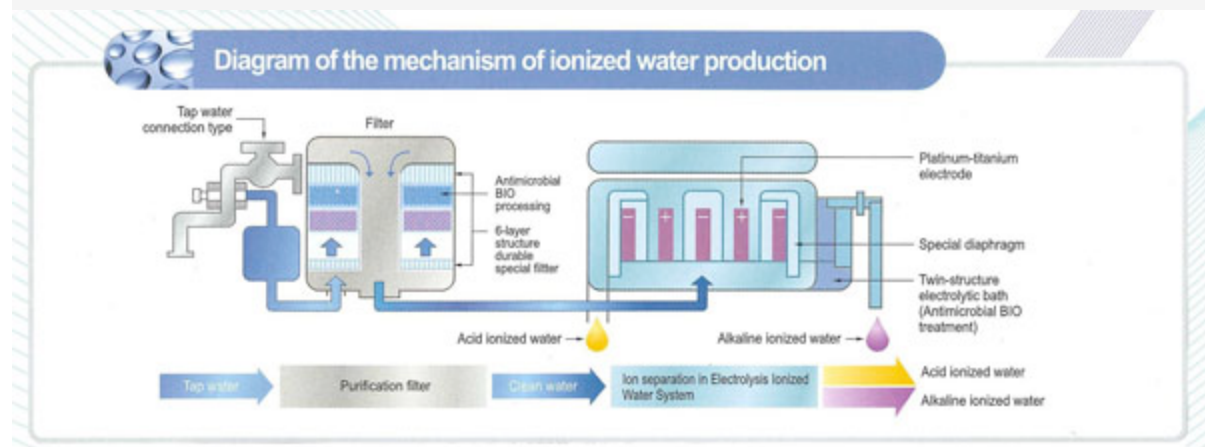

Now with the most advanced calibration system ever offered, this system assures you that the pH level you select is precise and completely accurate.

This is the only calibration system that filters all types of water to guarantee you are getting the best water quality available.

Developed in the 1950s, the Japanese invented water ionizers. By adding a strong electrical current to ordinary tap water, ionized, alkaline and acidic water are produced. This electrical process is known as electrolysis, which separates the water into two streams: alkaline mineral water for drinking and acidic mineral water for the skin, cleaning and sanitizing.

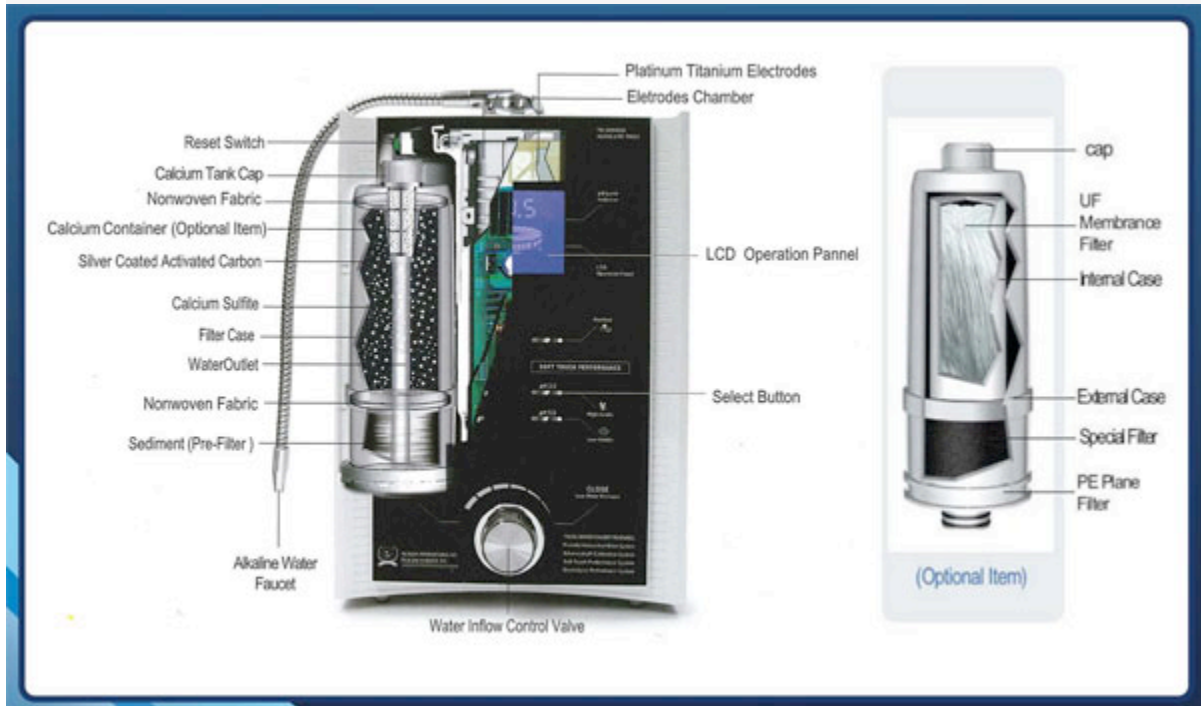

How It Works...

The process from tap to filtered ionized water

With the Alkal-Life 7000sL™ you are investing in your future. This machine is equipped with an advanced pH calibration system which allows regular tap water to channel through the process of ionization effectively. In the diagram above, you will see the process of ionization. Notice that regular tap water from your faucet first enters through a 6-layer purification filter. Next, purified water travels through electrolysis, where precise

ionized water is produced. By changing the pH setting, the Alkal-Life 7000sL™ has the ability to perform many functions.

Optimal Health

The Five Ingredients to Optimal Health with Alkal-Life Water

We've all heard the terms "free radicals" and "antioxidants" but do you know what they really mean?

Free radicals are unstable oxygen atoms that cause oxidation in our bodies which brings about aging and disease. Oxidation is what turns an apple brown after it is cut or causes metal to rust. The process of oxidation "steals" electron from the surface being oxidized. Antioxidants work by significantly slowing or preventing oxidation. Drinking ionized alkaline water helps scavenge free radicals in the body. It is nature's greatest antioxidant, laden with negatively charged hydrogen atoms.

Why is alkalinity important? Our bodies function best when they are neither too acid or too alkaline. Our blood system is always working to keep itself in the narrow range of pH 7.35 to 7.45. Alkaline water can neutralize the acidity of the body caused by stress, modern diet, air pollution and many bottled waters. An acidic body is a breeding ground for disease. Drinking ionized alkaline water greatly enhances the physiological process responsible for attaining and maintaining a relative blood and urine alkalinity. Alkalizing increases the body's natural defenses and strengthens immunity.

Alkal-Life Water Benefits

For You and The Environment

Affordable and Convenient

The Alkal-Life 7000sL™

Cost:

\$2,000.00 plus shipping & handling.

Guaranteed Low ORP!

The electrolysis process does not only alter tap water into a desired pH (potential hydrogen) level, it also compromises the Oxidation Reduction Potential (ORP). Altering molecules into micro clusters achieves the remarkable production of antioxidants!

In the average foods and beverages we consume, a negative (-) ORP number is a crucial ingredient to good health. High consumptions of acids and products with a positive (+) ORP will not only counter-balance undesirable oxidation to human cells, it can also lean and individual vulnerable to disease and age faster.

The Alkal-Life 7000sL™, inspired by leading researchers in Asia, will deliver you pristine water that has a higher absorption rate - a taste you can feel! Tested and proven to have a low ORP, we challenge you to try the advanced Alkal-Life 7000sL™ water ionizer.

Important Messages from Richway:

Do not miss reading about the Alkal-Life as follows.

The Alkal-Life is not a device to cure cancer or any other disease.

The Alkal-Life does not claim any medical benefits and does not claim to cure any disease or medical condition.

It does not claim any diagnosis or treatment.

Specific medical advice should be obtained from a licensed health care practitioner.

Any information and personal testimonies about the Alkal-Life does not reflect the Alkal-Life's claim.
